

Bulldozer™

Debris Nozzle

Size does matter...

When the industry started going to cheaper, lesser quality materials, UEMSI went big and created some of the most durable, versatile products on the market to date, thus becoming an industry leader.

UEMSI's newest component in our line of heavy duty cleaning products, "The Bulldozer," is an 11 lb. mega-nozzle equipped with 1 front jet and 5 rear jets to flush out more debris than our competitor's nozzles can shake a stick at.

Perfectly suited for 12"-24" pipe, "The Bulldozer" is available in 1", 1¼", and 1½" sizes to suit any of your sewer cleaning needs. At 3" in diameter x 14" long, "The Bulldozer" is the Sherman tank of UEMSI's product line. Next time you find a job that is comparable to a three-car pileup; ask for "The Bulldozer" to clear out your problems.

Simply put, bigger is better...

Bulldozer Nozzle™

WARNING:

HIGH PRESSURE USE!

- **Never operate high pressure sewer nozzles out of the sewer line. Position the nozzle two (2) feet or more, into the line before engaging.**
- **Build pressure slowly to ensure the nozzle is positioned correctly.**
- **Turn off pressure source before removing from sewer line and hose.**

FAILURE TO COMPLY MAY RESULT IN SERIOUS INJURY OR DEATH!

<u>Part Number</u>	<u>Size</u>	<u>GPM</u>	<u>PSI</u>
UE48216-60	1"	60	2000
UE48216-80	1"	80	2000
UE48220-60	1 ¼"	60	2000
